

Fusion OA Plus Knee Brace Innovation

With its sleek, lightweight design, Fusion OA Plus provides gentle medial or lateral off-loading for unicompartmental osteoarthritis. The hinge utilizes a telescoping condyle with our exclusive, user friendly thumbwheel dial design that allows patients to easily adjust the level of off-loading without using a tool. The Fusion OA Plus hinge also incorporates an offset gauge with a large viewing window to clearly display the amount of load applied in half millimeter increments.

Improved Comfort and Fit with Airtech® Innovation

Another key feature of the Fusion OA Plus products is the AirTech frame pads that are specifically designed to improve comfort and fit. AirTech is a complete system of air mesh vents and grooved channel frame pads that increase airflow throughout the brace. The system allows cool air in and moves warm air and moisture away from the skin, improving comfort. The pad technology also improves suspension, reduces pinching and helps alleviate pressure points. Additionally, since Fusion OA Plus features Breg's ProForm technology, it contours to the leg providing unhindered mobility, enhanced comfort, and ligament protection making it ideal for a variety of uses. Fusion OA Plus braces set the standard when it comes to suspension – it just stays where you put it!

Thumbwheel dial

Thumbwheel dial hinge makes off-loading easy.

Fusion and Freestyle knee braces gently apply pressure to the unaffected side to align the knee and relieve the compressive force on the affected side.

Fusion OA Plus Knee Brace

The Fusion OA Plus knee brace provides patients with medial compartment off-loading for unicompartmental osteoarthritis. It features Breg's exclusive adjustable hinge technology, which provides an effective valgus load to the knee. The hinge utilizes Breg's thumbwheel dial design that allows patients to easily adjust the level of offloading without using a tool. Breg's ProForm technology provides an intimate, contoured fit, that keeps the brace in place all day long. Fusion OA Plus provides medial / lateral, anterior / posterior stabilization and support.

Common Examples of Use

- Unicompartmental OA-medial
- Chondral defect procedures
- Meniscal procedures

Features

- AirTech frame pad
- Thumbwheel dial hinge for easy off-loading
- ProForm technology provides a contoured fit and protection
- Low profile, lightweight, contoured design
- Enhanced comfort with foam condyle pads, cushioned straps, and frame pads for all day support
