

RELAX™ CUSHION

Silicone liner with a unique
Umbrellan textile cover for
phantom pain relief

USER PROFILE:

- Transtibial amputation
- Patients who suffer from phantom pain, phantom sensations, idiopathic residual limb pain
- All K-levels

KEY FEATURES:

- Umbrellan cover – a unique, patented knitted fabric combining high elasticity with excellent electro-magnetic shielding
- Increased mobility due to possible pain relief or elimination through Umbrellan¹
- Vacuum suspension contributes to reduced pistoning in the socket
- Donning and doffing are made easier due to the textile cover
- Available in 3mm or 6mm profile
- 2 zone matrix
